## how to fold your echo glow hoop

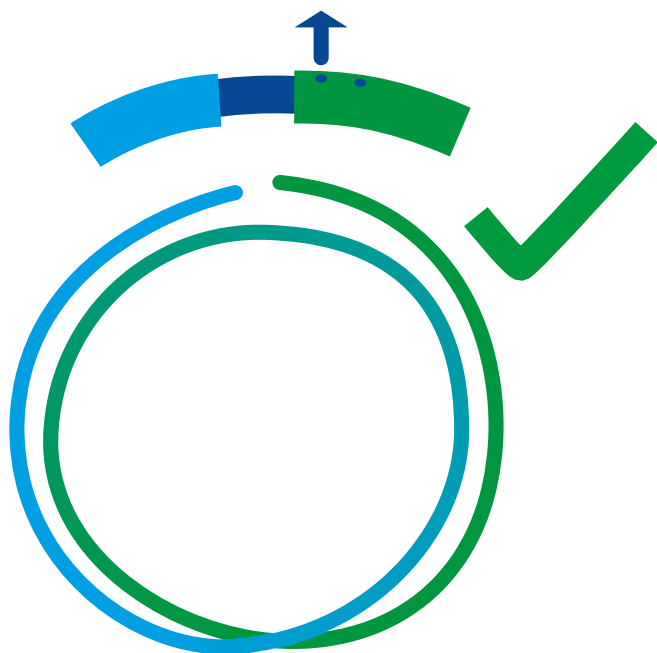

1. unclip the connector using the button spring

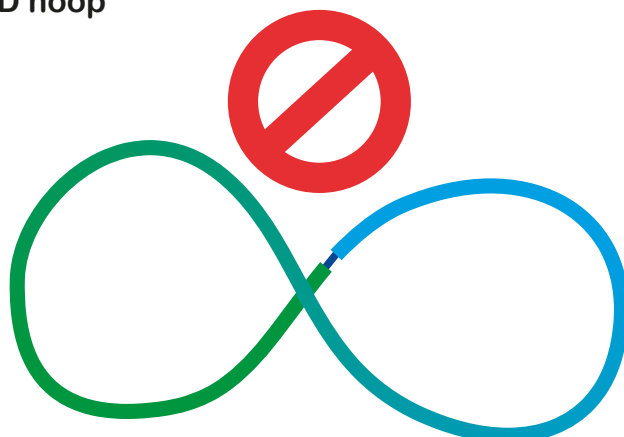

2. bend the hoop into a smaller loop until it meets again as shown

3. once the hoop is doubled over, reconnect the button spring to the first hole to keep it in position

do NOT partially unclip and twist the hoop as you might a regular travel hoop, as this can damage the sensitive internal components of the LED hoop

please only fold your hoop for travel, hula hoops should always be stored at full size where possible to reduce the risk of warping
